LAMAH TECHNOLOGIES

COMPANY PROFILE

Who We Are

Lamah Technologies is an IT solutions company founded in 2018 and based in Misrata, Libya where our headquarters remain to serve Africa, Lamah has grown into a regional technology leader with a GCC headquarters in Doha, Qatar.

We specialize in digital transformation, software development, and smart technology solutions that empower businesses and communities alike.

Guided by innovation and a commitment to progress, Lamah strives to create technology that supports sustainable development and drives digital transformation across all sectors.

Through advanced technology and collaboration, we enable organizations to optimize performance and achieve sustainable growth.

Our Vision

To redefine how technology drives growth across Africa and the GCC by building inclusive digital ecosystems that foster progress, empower communities, and inspire innovation.

Our Mission

To design and deliver transformative digital ecosystems that simplify governance, empower communities and elevate economies across Africa and the GCC We turn ideas into intelligent systems, connecting organizations and people through innovation that is scalable, secure, and human entered.

Our Philosophy

01 **Innovation that Matters**
Every product we create solves a real problem and delivers tangible impact.

02 **Experience First**
Technology succeeds when it feels natural. We craft digital experiences that are intuitive, reliable, and human.

03 **Collaboration Over Competition**
We believe in building ecosystemsnot silos. Our partnerships with governments, enterprises, and communities drive collective progress.

04 **Sustainability by Design**
Every solution is built for longevity adaptable, efficient, and environmentally conscious.

Innovation at Scale

Lamah Technologies has built platforms that touch millions of lives powering national digital addressing systems municipal service platforms, and smart data ecosystems across Africa and the GCC.

'**We**

don't just build tecnology we build trust, enable transformation, and create digital value that lasts. '
